A selection of publications recently added to the Library. The majority of these publications may be borrowed by Fellows or employees of Corporate Affiliates of the Geological Society who are resident in the U.K. and Ireland. For details of availability of any item please apply to the Library.

The Geological Society's rooms will be open to the public on Saturday 17th September from 10a.m.-5.30p.m. (last tour 5 p.m.) as part of ***Open House London***. Other venues open over that weekend may be searched online

<http://www.londonopenhouse.org/public/london/find/> or details of how to purchase the programme can be found at <http://www.londonopenhouse.org/important/guide.html>.

A copy of the programme is available for reference in the Fellows' Room.

Books and Journal Special issues

12th Meeting of the International Nannoplankton Association, Lyon 2008.

Mattioli, Emanuela (ed.) ; Giraud, Fabienne (ed.)
Issy-les-Moulineaux: Elsevier Masson, 2010.
(Geobios; 43 (1))

Thematic issue arising from some of the contributions presented during the biennial meeting of the INA held in the University of Lyon from the 7th to 13th September 2008.

Location: [Serial]

17th [Conference on] Deformation Mechanisms, Rheology and Tectonics 2009 ... Liverpool - Manchester Universities, 7th-9th September 2009: abstract volume.

[S.l.]: [The conference], 2009.

"Martin Casey Memorial Meeting" - T.p. ;

Sponsor a Fish!

The Library has launched a new project to conserve and digitise one of the most important, if lesser known, collections housed in the Geological Society's Archive: the fossil fish portfolio of Louis Agassiz (1807-1873).

Agassiz gained international recognition as the leading figure on fossil ichthyology after the publication of the five volume *Recherches sur les Poissons Fossiles*, lavishly illustrated with 400 lithographic plates of fish (1833-1843). In 1836 he was awarded the Geological Society's Wollaston Medal.

Comprising nearly 2,000 watercolours and drawings, these images of fossil fish, dating from the 1830s-1860s, were copied from private and public collections around Europe, principally by the German artist Joseph Dinkel. For many years the drawings were kept in a trunk in the Museum and later in different places around the Society. We would now like to make them accessible to future generations of researchers by conserving and digitising the entire collection.

If you would like to help the Library and Archive in this project, a small contribution of £20 will allow us to carefully clean, conserve and digitise one fish. The names of all sponsors will be included in a roll of honour in the Archive and on our website.

To contribute, send a cheque to the Library (made payable to 'The Geological Society'), or call 020 7432 0999 to pay by card.

Further information about the collection is available on the Society's website at <http://www.geolsoc.org.uk/gsl/sponsorafish>
