The joy of going to the Library!

Read online the views of Brian Romans of Virginia Tech

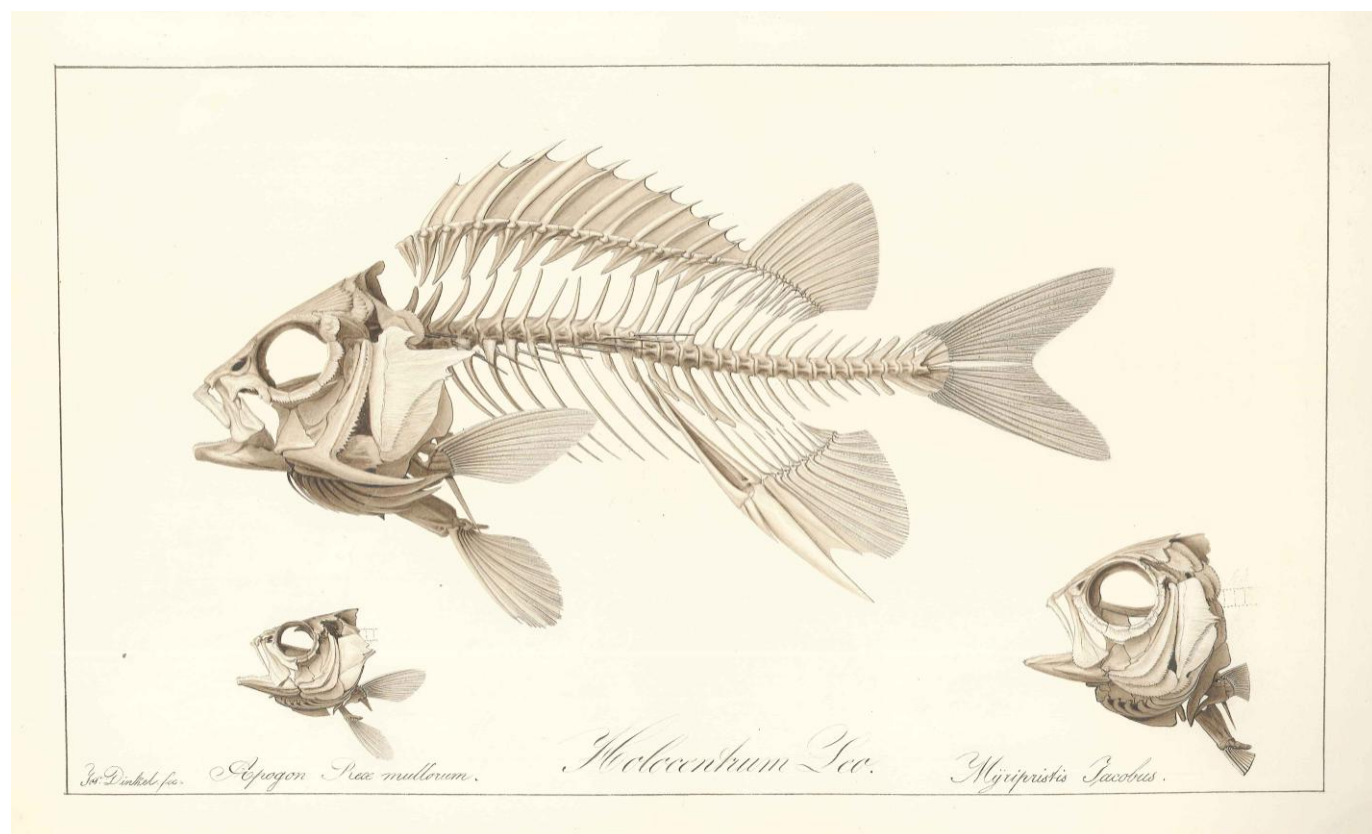

<http://www.wired.com/wiredscience/2011/10/the-joy-of-going-to-the-library/>

“When I started this new position a couple months ago I made a pact with myself to go to the library at least once a week. ... Although I was fortunate enough to have digital access to the latest journal articles in my previous position, I missed the act of strolling down those narrow corridors created by bookcases. There’s something nice about browsing the titles of textbooks, special publications, memoirs, and other scholarly books. ...”

The Geological Society’s library staff will be only too happy to welcome back our Fellows who have taken a ‘digital break’!

Sponsor A Fish Appeal

The appeal to conserve and digitise the two thousand watercolours from the fossil fish collection of Louis Agassiz got off to an impressive start, with nearly £4000 raised in the first two months!

The Agassiz watercolours and drawings, dating from the 1830s-1860s, were copied from private and public collections around Europe, principally by the German artist Joseph Dinkel. The Library and Archive wishes to make this unique portfolio accessible to researchers by cleaning and digitising the entire collection.

There is still a long way to go to reach our target so if you would like to sponsor a fish please send a cheque for £20 (or more for more fish!), made payable to 'The Geological Society', or contact the Library to pay by card.

More information about the appeal can be found at www.geolsoc.org.uk/sponsorafish
