

# Resource Estimation in Micromine Advanced Training in 2015

Learn how to generate robust mineral resource estimates in our flagship 3D geological modelling solution, Micromine.

- The two-day **Resource Estimation in Micromine** course will provide a theoretical and practical overview of mineral resource estimation tools in Micromine.
- From exploratory data analysis to grade interpretation, resource classification and block model reporting, participants will gain an overview of the real world application of resource estimation techniques.
- The courses are led by experienced practitioners and delivered on a quarterly basis in London at **a heavily reduced rate of £500**. Spaces are limited.

## DATES FOR 2015

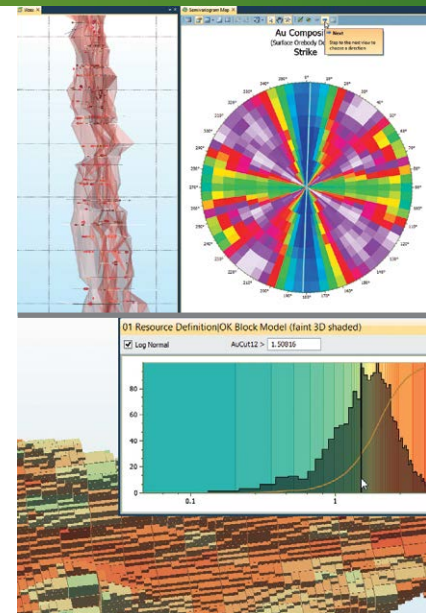

January 15-16, 2015 • April 16-17, 2015 • July 16-17, 2015 • October 15-16, 2015

*\*Please note that delegates must have completed our Introduction to Micromine training prior to attending this course.*

[www.micromine.com](http://www.micromine.com)

Australia • Brazil • Canada • Chile • China • Indonesia • Kazakhstan • Mongolia • Russia • South Africa • Turkey • Ukraine • United Kingdom • USA

# What you will learn

- Use classical statistics to describe assay data and to make key decisions such choice cut-off value and interpolation technique.
- Apply geological domains, flag and composite assay samples.
- Produce a global reference estimate.
- Learn the decision making process for and create a block model.
- Produce an appropriate search neighbourhood.
- Interpolate assay grades using inverse distance weighting.
- Validate the resulting block model and interpolation.
- Considerations for classification.
- Resource reporting.

Please contact MICROMINE UK at **mmuk@micromine.com** to apply, or visit **www.micromine.com** for further information and to download an application form.

*Don't miss this fantastic opportunity!*

With offices located throughout the world's major mineral producing capitals, MICROMINE is the leading provider of intuitive software solutions that deliver operational efficiencies through every step of the mining and exploration process.

MICROMINE provides you with local support and services in your language and your time zone.
