

# The Introduction to Micromine course is coming to Ireland!

Register your interest in our Introduction to Micromine course to gain practical experience and boost your employability!

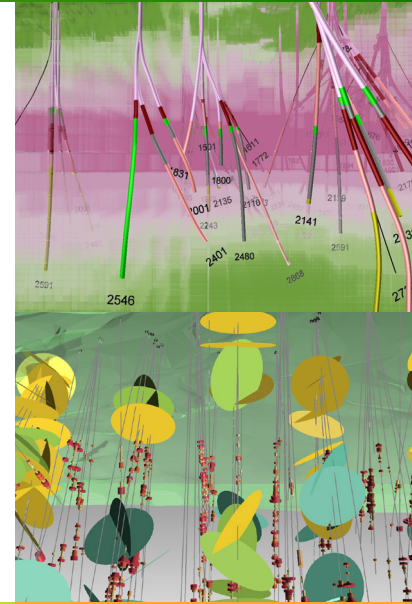

Register your interest in our subsidised Introduction to Micromine course now!

Our two-day course, specifically designed for students and geologists who are presently underemployed and unemployed, is formally accredited by The Geological Society.

Price per person - € 150

This is an excellent opportunity to broaden your skills and knowledge of an industry leading technology.

Please email [mmuk@micromine.com](mailto:mmuk@micromine.com) to register your interest before 31 May 2016!

# What you will learn

## How to master the basis of your Micromine software, by working through the key features:

- Import and assess data from a newly acquired exploration project in order to make recommendations on future drilling.
- Visual integration of different 2D and 3D data using the Vizex (Visual Explorer) interface.
- Generate drillhole sections and produce printed output.

## How to get the most out of your exploration data:

- Gain a greater understanding of Micromine to perform tasks beyond just displaying data.
- Use tools in Micromine specifically suited for exploration work.

Please contact MICROMINE UK at [mmuk@micromine.com](mailto:mmuk@micromine.com) to register your interest, or visit [www.micromine.com](http://www.micromine.com) for further information.

With offices located throughout the world's major mineral producing capitals, MICROMINE is the leading provider of intuitive software solutions that deliver operational efficiencies through every step of the mining and exploration process.

MICROMINE provides you with local support and services in your language and your time zone.
