# Online Archives: Special Publications

Geological Society of London Special Publications are renowned throughout the global geoscience community for their high quality of science and production. Each volume focuses on a specific theme and represents a balanced, state-of-the-art treatment of the subject matter. The first was published in 1964 as a supplement to the *Quarterly Journal of the Geological Society* (the precursor to the *Journal of the Geological Society*) and was retrospectively numbered as a Special Publication. The series gained its current clear identity in 1981.

Special Publications form a major part of the Lyell Collection, the Geological Society's online collection of all key content published since 1845. Abstracts, PDF and references have been captured up to and including volume 277, with later volumes also including full text HTML.

Purchase Special Publication archives outright for a one-off fee allowing perpetual access. There is no annual maintenance charge.

More information and a download of the Special Publication titles in the various archives is available from [www.geolsoc.org.uk/online-archives/](http://www.geolsoc.org.uk/online-archives/)

MARC records and KBART files are included in the WorldCat® knowledge base to aid discoverability. Files can be downloaded from <https://www.geolsoc.org.uk/marcrecords>

# Online Archives: *Journal of the Geological Society*

Journal of the Geological Society (JGS) publishes topical, high-quality recent research across the full range of Earth Sciences. Papers are interdisciplinary in nature and emphasize the development of an understanding of fundamental geological processes. The journal includes broad interest articles that refer to regional studies, but which extend beyond their geographical context.

The JGS Archive (1845-2007) includes over 17,000 articles and comprises over 150 years of geoscience research, including historically important content from many eminent scientists. Access the very earliest geological research from the greats such as Darwin, Murchison, and Buckland to modern cutting-edge research from an international field of authors. The *Quarterly Journal of the Geological Society* (1845 to 1970) was re-named the *Journal of the Geological Society* in 1971.

The JGS archives are hosted on the Geological Society's Lyell Collection, and there is no annual maintenance charge.
