

Workshop

Exploring Geoethics & AI Workshop

A 6-hour workshop designed to be participatory and interdisciplinary, with a good progression from knowledge to application, balancing theoretical foundations with practical applications.

Aims of workshop

To provide conceptual and operational tools to understand and apply the principles of geoethics in research, professional, and decision-making activities related to geosciences and the society–environment relationship.

Learning outcomes

By the end of the workshop, participants will be able to:

- Explain the core principles of geoethics and their historical development
- Identify ethical conflicts in resource, risk, and environmental governance contexts
- Apply a structured framework to analyses geoethical dilemmas
- Formulate ethically justified decisions in conditions of uncertainty
