

13th UK Geothermal Symposium

9-10 November 2026

Cloth Hall Court, Leeds and Virtual

Provisional Programme

Geothermal Core Workshop 13th UK Geothermal Symposium	
10.00-13.00, 11 November 2026 (Separate registration required)	
<i>School of Earth and Environment, University of Leeds</i>	
Shallow aquifers present an opportunity to decarbonise through accessing their fluids and harnessing heat pump technology for geothermal heating and cooling. The Carboniferous Lower Coal Measures and Millstone Grit groups contain sandstone aquifers (the Elland Flags formation and Rough Rock Flags formation, respectively) that are present below the West Yorkshire region and have been targeted by the University of Leeds Geothermal Campus project. Sandstone aquifers such as these with mixed permeability systems represent analogues for other potential geothermal target aquifer systems nationally. With access to core samples recovered for these intervals, participants will gain firsthand experience in the characterisation and analysis of geothermal aquifer systems via a hands-on core workshop. Weather permitting participants will also get a tour of the sites belonging to the Leeds Living Lab. Hosts: Dr Arka Dyuti Sarkar and Dr Richard Collier	

Day One	
Tuesday 9 th November 2026	
08.30	Registration
09.00	Welcome
	Session One: Strategy, Policy & Regulation
09.15	The Resource Is Ready: A Strategy to Build a Geothermal Nation <i>Charlotte Adams, National Geothermal Centre</i>
9.30	Next-generation geothermal: global market momentum and the UK opportunity <i>Kate Adie, Wood Mackenzie</i>
9.45	Navigating England's Geothermal Regulations: Current Requirements and Recent Changes <i>Diane Steele, Environment Agency</i>
10.00 Virtual	Governance and Regulation of High-Temperature Energy Storage within the European PUSH-IT project: Results from Interviews with Regulators and Operators <i>Margaret Stewart, British Geological Survey</i>

10.15	Understanding Gender and Inclusion in the UK Geothermal Sector: Insights from a National Survey Rebecca Nye, <i>WING UK</i>
10.30	BREAK
	Session Two: Campus Geothermal, Cities & Heat Networks
10.45	Building a Geothermal Exemplar City: pathways for place-based urban heat decarbonisation Emma Bramham, <i>University of Leeds</i>
11.00	Assessing the potential for geothermal energy deployment in Greater Manchester: first steps towards a place-based solution for heating and cooling Cathy Hollis, <i>University of Manchester</i>
11.15	CeraPhi Case Studies Karl Farrow, <i>CeraPhi Energy</i>
11.30	Deep Geothermal: Tales from a Project in Process Paul Bushnell, <i>University of York</i>
11.45	Oxford Brookes University Case Study Rachel Feeney, <i>Erda Energy</i>
12.00	Beyond the Borehole: Lessons from Szeged Richard Toy, <i>Ventossus UK</i>
	Session Three: Community Engagement & Social Licence
12.15 Virtual	Cross-Atlantic Lessons in Community-Led Geothermal Saxon Metzger, <i>Wilmington University</i>
12.30	Community-led geothermal: developing a replicable model for rural heat decarbonisation in Pickering James Van Alstine, <i>University of Leeds</i>
12.45	The Heat Beneath Our Feet: Creatively inspiring public audiences with geothermal technologies Rory Padfield, <i>University of Leeds</i>
13.00	LUNCH
14.00	Harnessing History to Heat Homes Anna Hitchmough, <i>Envireau</i>
14.15	Geothermal Meets the Real World Richard Lane, <i>Drift Group</i>
	Session Four: Numerical Modelling & Digital Workflows
14.30	Sketch-based Geological Modelling and Flow Diagnostic for Geothermal Exploration Carl Jacquemyn, <i>Imperial College London</i>
14.45	A novel approach to modelling Advanced Geothermal Systems using a 3D Geological Modelling Software Rifky Wijanarko, <i>WSP</i>
15.00	BREAK
15.15	POSTER SESSION
16.05	A probabilistic approach for rapid assessment of open-loop Ground Source Heating and Cooling (GSHC) and Aquifer Thermal Energy Storage (ATES) deployments Matthew Jackson, <i>Imperial College London</i>

16.20	High-density ATES design for a spatially constrained urban campus: Imperial College London's South Kensington campus <i>Meissam Bahlali, Imperial College London</i>
16.35	Exploring Challenging Subsurface Settings for ATES <i>Luka Tas, Ghent University</i>
16.50	Long-Term Performance and Sustainability of Asymmetric Open-Loop Geothermal Heating: Numerical Modelling of an 8-Month Extraction, 4-Month Recovery Strategy <i>Allegra Giblin Torlucci, University of Leeds</i>
17.00	End of day one
17.05-18.05	Drinks reception

Day Two Wednesday 10 th November 2026	
08.30	Registration
08.45	Welcome
	Session Five: Minewater Geothermal & Thermal Energy Storage
09.00	Project IMPACT: Investigating Mine Potential for Cooling and Storage <i>Fiona Todd, Mining Remediation Authority</i>
09.15	Mine-Groundwater Interactions and the Effects on Mine Water Geothermal Resource Feasibility <i>Callum Thomas, Durham University</i>
09.30	Time-dependent GEMSToolbox: fast, accurate heat exchange for mine water heat storage <i>Difu Shi, Durham University</i>
09.45	Using Heat to Characterise Groundwater Flow in a Fractured Chalk Aquifer <i>Joseph Kelly, University of Leeds</i>
10.00	Effective Thermal Conductivity of the Sherwood Sandstone, evaluated from time-lapse Electrical Resistivity Imaging <i>Adam Booth, University of Leeds</i>
10.15	BREAK
	Session Six: Fractures, Reservoir Characterisation & UK Exploration
10.30	De-risking UK Lower Carboniferous Limestone geothermal resources using legacy seismic and potential-field data <i>Mohamed Gouiza, University of Leeds</i>
10.45	From outcrop to reservoir: multi-scale fracture analysis for potential deep geothermal development in Cornwall <i>Priyanka Paul, British Geological Survey</i>
11.00	Seismic Anisotropy of Hengill geothermal area, southwest Iceland <i>Esme Glastonbury-Southern, University of Leeds</i>
11.15	Modeling fracture networks and fluid flow in the Þeistareykir geothermal area <i>Aastha, University of Leeds</i>

11.30	GEMINI Integrated Geophysical Surveys for Deep Geothermal Exploration in County Antrim Michael MacKenzie, <i>Geological Survey of Northern Ireland</i>
11.45	Imaging Aberdeen with seismic noise: passive seismic methods for geothermal exploration David Cornwell, <i>University of Aberdeen</i>
12.00	LUNCH
	Session Seven: Innovative Techniques, Data & Monitoring
13.00	Thermal Conductivity of the Lower Pennine Coal Measures & Upper Millstone Grit at the University of Leeds Geothermal Living Lab Fleur Loveridge, <i>University of Leeds</i>
13.15	Characterisation of ground source heat pump boreholes at the BGS Keyworth Campus 'Living Lab' in Nottingham, UK David Boon, <i>British Geological Survey</i>
13.30	Revisiting Borehole Heat Flow Estimates from the British Isles Using a Reproducible Computational Framework Mark Ireland, <i>Newcastle University</i>
13.45	Thermogeological tidbits from the Caledonian table: preliminary findings of THERMOCAL in the UK Sean Watson, <i>University of Glasgow</i>
14.00	Making Shallow Geothermal Work: Lessons from Deep Drilling Ian Farmer, <i>Independent Drilling Consultant</i>
14.15	The Geothermal Potential of the Humber Region David Peacock, <i>University of Hull</i>
14.30	Testing Geothermal Hypotheses beneath Corbetti, Ethiopia with 3D S-wave seismic tomography Andy Nowacki, <i>University of Leeds</i>
14.45	Trace Element Geochemistry of the Sorik Marapi Geothermal Field, Indonesia Konstantin Nazarov, <i>University of Oxford</i>
15.00	BREAK
	Session Eight: Geothermal From Around the World
15.15 Virtual	Structural Controls in the Hengill Geothermal System, Iceland Brandon VanderBeek, <i>University of Oxford</i>
15.30	Geothermal Energy Applications in Poultry Farming: Opportunities for Climate Change Mitigation and Sustainable Development Abdelmalek Atia, <i>University of El Oued, Algeria</i>
15.45	Expecting the Unexpected: The Geology of the Granite City Clare Bond, <i>University of Aberdeen</i>
16.00	Conference Summary & Discussion
16.15	Energy Group Update
16.30	Closing Remarks
16.45	End of day two
