 The Geological Society,
Burlington House, Piccadilly,
London, W1J 0BG

The WCSB12 theme is **Sampling for a Sustainable World** which aims to provide discussions on relevant issues across mining and minerals; raw materials and products; food and feed; medicine and pharma; recycling; and the environment.

WCSB12 will seek to highlight as many fields as possible where proper sampling is performed in the service of sustainable science, technology and industry, the circular economy, and mitigation of climate change.

WCSB12 aims to bring together the diverse international sampling community to present and debate concepts and ideas for a standardised approach to sampling embodied in TOS.

Attendees will find that the conference presents a mix of Theory and Practical (case studies) presentations; with the opportunity to network with a range of researchers and practitioners.

How to get involved

Abstracts are invited across any aspect of sampling and blending. The deadline to submit abstracts is **15 June 2026**.

For more information about the meeting, including abstract submission or registration, please visit the meeting webpage:
