# Chinese Historical Maps of China

## What to expect

To celebrate the upcoming Year of the Horse, an interesting talk looking at historical Chinese language maps of China (with longitude & latitude) has been organised. Starting with the earliest known Chinese world map based on Chinese cartography that Matteo Ricci and Chinese scholars put together in 1602 (Ming Dynasty), then going through various official Qing Dynasty and Republican era maps.

## About the Speaker

### Glenn Sheldon

Glenn is Australian and based in Hong Kong. He's an economic geologist holding a BSc from Adelaide University. He's a Fellow of AusIMM (Australasian Institute of Mining and Metallurgy), Fellow of AIG (Australian Institute of Geoscientists) and a Member of SEG (Society of Economic Geologists).
