

# Geology, Tectonics and Natural Resources of Arabia and its Surroundings

Edited by  
A. Scharf, M. Al-Kindi and A. Racey

Geological Society  
Special Publication 550

## The Geological Society of London Books Editorial Committee

### Chief Editor

Teresa Sabato Ceraldi (UK)

### Society Books Editors

Angela L. Coe (UK)  
Renee M. Clary (USA)  
Katriona Edlmann (UK)  
Jim Griffiths (UK)  
Malcolm Hart (UK)  
Mads Huuse (UK)  
Rob Knipe (UK)  
Phil Leat (UK)  
Valentina Marzia Rossi (Italy)  
Soumyajit Mukherjee (India)  
Andrew Newton (UK)  
Randell Stephenson (UK)  
Gabor Tari (Austria)  
Mark Whiteman (UK)

### Society Books Advisors

Sietske J. Batenburg (Spain)  
Kathakali Bhattacharyya (India)  
Paula Dentzian-Dias (Brazil)  
Xiumian Hu (China)  
Christian Koeberl (Austria)  
Sónia Silva Victória (Cape Verde)

The scientific and production quality of the Geological Society's books matches that of its journals. Since 1997, all book proposals are reviewed by two individual experts and the Society's Books Editorial Committee. Proposals are only accepted once any identified weaknesses are addressed.

The Geological Society of London is signed up to the Committee on Publication Ethics (COPE) and follows the highest standards of publication ethics. Once a book has been accepted, the volume editors agree to follow the Society's Code of Publication Ethics and facilitate a peer review process involving two independent reviewers. This is overseen by the Society Book Editors who ensure these standards are adhered to.

Geological Society books are timely volumes in topics of current interest. Proposals are often devised by editors around a specific theme or they may arise from meetings. Irrespective of origin, editors seek additional contributions throughout the editing process to ensure that the volume is balanced and representative of the current state of the field.

### Submitting a book proposal

More information about submitting a proposal and producing a book for the Society can be found at <https://www.lyellcollection.org/publishing-hub/proposals>.

It is recommended that reference to all or part of this book should be made in one of the following ways:

Scharf, A., Al-Kindi, M. and Racey, A. (eds) *Geology, Tectonics and Natural Resources of Arabia and its Surroundings*. Geological Society, London, Special Publications, **550**, <https://doi.org/10.1144/SP550-000>

Ahmed, A.H., Al-Khribash, S. and Semhi, K. 2025. Mineralogy, geochemistry and origin of Late Cretaceous ironstone deposits, Oman Mountains. *Geological Society, London, Special Publications*, **550**, 243–272, <https://doi.org/10.1144/SP550-2023-40>

## The Geological Society of London

The Geological Society of London is a not-for-profit organization, and a registered charity (no. 210161). Our aims are to improve knowledge and understanding of the Earth, to promote Earth science education and awareness, and to promote professional excellence and ethical standards in the work of Earth scientists, for the public good. Founded in 1807, we are the oldest geological society in the world. Today, we are a world-leading communicator of Earth science – through scholarly publishing, library and information services, cutting-edge scientific conferences, education activities and outreach to the general public. We also provide impartial scientific information and evidence to support policy-making and public debate about the challenges facing humanity. For more about the Society, please go to <https://www.geolsoc.org.uk/>

**The Geological Society Publishing House** (Bath, UK) produces the Society's international journals and books, and acts as European distributor for selected publications of the American Association of Petroleum Geologists (AAPG), the Geological Society of America (GSA), the Society for Sedimentary Geology (SEPM) and the Geologists' Association (GA). GSL Fellows may purchase these societies' publications at a discount. The Society's online bookshop is at <https://www.geolsoc.org.uk/bookshop>

### Membership

Become part of the Geological Society community and unlock a wealth of benefits. Enjoy access to over 500 books and one journal option online in the Lyell Collection, discounts on printed publications, events, training courses and more. Learn more: <https://www.geolsoc.org.uk>.

For information about the Society's events, training courses, Corporate Patrons and more go to <https://www.geolsoc.org.uk>.

### Proposing a book

If you are interested in proposing a book then please visit: <https://www.lyellcollection.org/publishing-hub/proposals>

### Published and manufactured by The Geological Society from:

The Geological Society Publishing House, Unit 7 Brassmill Enterprise Centre, Brassmill Lane, Bath BA1 3JN, UK  
[www.geolsoc.org.uk](http://www.geolsoc.org.uk) and [sales@geolsoc.org.uk](mailto:sales@geolsoc.org.uk)

### For Product Safety concerns and information please contact our EU representative:

Authorised Rep Compliance Ltd, Ground Floor, 71 Lower Baggot Street, Dublin D02 P593, Ireland  
[www.arccompliance.com](http://www.arccompliance.com)

### To purchase copies:

Visit the Lyell Collection: [www.lyellcollection.org](http://www.lyellcollection.org)

Online bookshop: [www.geolsoc.org.uk/bookshop](http://www.geolsoc.org.uk/bookshop)

Orders: Tel. +44 (0)1225 445046, Email: [sales@geolsoc.org.uk](mailto:sales@geolsoc.org.uk)

The publishers make no representation, express or implied, with regard to the accuracy of the information contained in this book and cannot accept any legal responsibility for any errors or omissions that may be made.

Except as otherwise permitted under the Copyright, Designs and Patents Act, 1988, this publication may only be reproduced, stored or transmitted, in any form or by any other means, with the prior permission in writing of the publisher, or in the case of reprographic reproduction, in accordance with the terms of a licence issued by the Copyright Licensing Agency in the UK, or the Copyright Clearance Center in the USA. In particular, the Society permits the making of a single photocopy of an article from this issue (under Sections 29 and 38 of this Act) for an individual for the purposes of research or private study. Open access articles, which are published under a CC-BY licence, may be re-used without permission, but subject to acknowledgement.

Full information on the Society's permissions policy can be found at <https://www.geolsoc.org.uk/permissions>

### British Library Cataloguing in Publication Data

A catalogue record for this book is available from the British Library.

ISBN 978-1-78620-622-0

ISSN 0305-8719

### Printed books

For details of North American and other distributors see:

<https://www.geolsoc.org.uk/publishing/contact-us/>

Typeset by Nova Techset Private Limited, Bengaluru & Chennai, India

Printed and bound by CPI Group (UK) Ltd, Croydon CR0 4YY, UK

## Contents

<b>Scharf, A., Al-Kindi, M. and Racey, A.</b> An introduction to geology, tectonics and natural resources of Arabia and its surroundings	1
<b>Bauer, W., Jacobs, J., Callegari, I., Scharf, A., Schmidt, J. and Mattern, F.</b> New constraints on the Neoproterozoic geological evolution of the SE corner of the Arabian Plate (NE Oman)	11
<b>Gómez-Pérez, I. and Morton, A.</b> Neoproterozoic–early Paleozoic tectonic evolution of Oman revisited: implications for the consolidation of Gondwana	27
<b>Rasaona, I. T., Edwards, L. E., Collins, A. S., Rakotondrazafy, A. F. M. and Bauer, W.</b> The Betsiaka Group in northern Madagascar: a palaeoproterozoic terrane along the northern margin of the Bemarivo Domain	65
<b>Whitehouse, M. J., Flowerdew, M. J., Petersson, A., Al-Khribash, S. and Stoeser, D. B.</b> The Amlah terrane, Yemen – a missing link in the Neoproterozoic tectonic collage of the Arabian Shield	83
<b>Flowerdew, M. J., Whitehouse, M. J., Stoeser, D. B. and Badenszki, E.</b> Post-orogenic magmatism from within the Al Mukalla terrane, Yemen: a record of Cambrian extension within a Neoproterozoic arc terrane	105
<b>Smewing, J. D., Ilic, A. and Razi, M. F.</b> Late Neoproterozoic alkaline intrusives in Huqf sediments; a new reservoir target in southern Oman	119
<b>Morley, C. K. and Back, S.</b> The Proterozoic–Cambrian salt detachment zone at Lakhar Kuh, Iran: a seismic-scale analogue for salt stringers, detachment folding and multiphase structural development	131
<b>Moss, J., Tansell, C., Gómez-Pérez, I., McCabe, R., Fairey, B. and al Thohli, B.</b> Chemostratigraphic characterization of the Lower Paleozoic Amdeh Formation outcrops and correlation to the subsurface Haima Supergroup and Nimr Group, Sultanate of Oman	163
<b>Stephenson, M. H.</b> Palynology of strata associated with the Hercynian Unconformity across the Arabian Plate, from the Levant to southern Arabia	199
<b>Poppelreiter, M. C., Claps, M., Rankey, E., Rao, N. S., Al-Dousiri, M., Al-Anzi, A. and Al-Ajmi, A. S.</b> Architecture of the Early Jurassic Middle Marrat Formation in Kuwait	221
<b>Ahmed, A. H., Al-Khribash, S. and Semhi, K.</b> Mineralogy, geochemistry and origin of Late Cretaceous ironstone deposits, Oman Mountains	243
<b>Racey, A., Goodall, J. G. S., Keen, M. C., Stead, D. T. and Starkie, S.</b> Palynology, micropalaeontology and geochemistry of the Eocene Rusayl Formation of Northern Oman	273
<b>Szymanski, E. and Stockli, D. F.</b> $^{40}\text{Ar}/^{39}\text{Ar}$ chronostratigraphy and geochemistry of Harrats Ishara and Kura in the Hamd–Jizl Basin, Madinah, Saudi Arabia	311
<b>Afzal, J. and Racey, A.</b> Early Miocene larger foraminifera from Suwadi Island, northern Oman	333
<b>Al-Helal, A. B. and Al-Mahmoud, M. J.</b> Intra-plate Jal Az-Zor strike-slip faulting deciphering the enigma of local earthquakes in Kuwait	363

<b>Weidle, C., Glück, E., Deif, A., El-Hussain, I. and Meier, T.</b> Seismicity and state of stress in NE Arabia	389
<b>Heward, A. P., Morton, M. Q. and Al-Kindi, M.</b> The search for petroleum in the Sultanate of Oman – the first 120 years	403
<b>Al-Kindi, M.</b> Overview of the carbon capture and storage opportunities in Oman	449
<b>Hofmann, B. A. and Gnos, E.</b> The meteoritic record of Arabia	469
Index	493

# Index

Page numbers in *italics* refer to Figures. Page numbers in **bold** refer to Tables.

- Ab-e-Haji Formation, Iran *134, 135, 136, 146*
- Abas Terrane, Yemen *30, 84, 85, 86, 95, 96, 97, 97, 98, 98, 99, 99, 100, 110, 110, 111, 112, 113*
- Abu Mahara Group, Oman *13, 22, 23, 32, 33, 34, 34, 36, 40, 41, 43, 44, 45, 46, 47, 48, 49, 50, 51, 55, 120, 120, 122*
- Abu Safah (ABSF) Field, Arabian Gulf *200, 202, 208–209*
- achondrites *470, 471, 478*
- acritarchs *168, 169, 186, 187, 188, 210*
- Afar Field, Oman *419, 420, 431, 436*
- Al Ays Group, Saudi Arabia *315, 316, 329*
- Al Bashair Formation, Oman *165, 168, 173, 174, 175, 176, 177, 178, 182–186, 184, 188, 189, 191, 192, 437–438, 437*
- Al Batin Arch *199, 200–201, 200, 209, 214*
- Al Bayda Terrane, Yemen *84, 85, 100, 106, 106, 107, 110, 111, 112, 113, 113, 114*
- Al Hoota Formation, Oman *32, 34, 35, 37, 41, 42, 43, 44, 45, 48, 49, 51, 51, 52*
- Al Khlata Formation, Oman *55, 200, 201, 202, 207, 210–213, 214, 413, 424, 429, 450, 455, 455, 461, 462, 462, 463*
- Al Mahfid Terrane, Yemen *85, 97, 100, 106, 106, 107, 112–113, 113*
- Al Mukalla Terrane, Yemen *84, 85*  
*see also post-orogenic magmatism of Al Mukalla Terrane*
- Al Noor Formation, Oman *33, 33, 34, 38, 39, 50, 51, 54*
- Al Qarah–Malahah Terrane, Saudi Arabia *84, 84, 85, 86, 97, 98–99, 98, 99, 100, 101*
- algae  
Middle Marrat Formation, Kuwait *225, 228, 230*  
Rusayl Formation, Oman *279, 288, 289, 290, 291*  
Saad and Arqov formations, Israel *203*  
Sur Formation, Oman *335, 336, 337, 338, 340, 341*
- Amal Field, Oman *424, 425, 428, 435, 440, 441*
- Amdeh Formation, Oman *14, 14, 15, 36, 51*  
*see also chemostratigraphic subsurface correlation of Amdeh Formation*
- Amin Formation, Oman *163, 165, 168, 173, 174, 175, 176, 176, 177, 178, 180–182, 181, 183, 184, 186, 188, 189, 190, 191, 192*
- Amlah Terrane, Yemen *83–101, 110, 110, 112, 113*  
discussion  
correlation to terranes in Saudi Arabia *99, 100*  
magmatic evolution of Amlah Terrane *97–98, 98*  
relationship to adjacent Terranes *98–100, 99*  
geological setting and previous investigations *84, 85–86, 86*  
results  
major and trace element geochemistry *87–88, 88*  
Sm–Nd and feldspar Pb isotope data *95–97, 96, 97*  
zircon U–Pb geochronology *88–95, 89, 90, 92, 93, 94*  
sampling and methods *86–87, 86*
- Amoco *403, 427, 431–432, 431, 436, 438*
- Amphistegina* *333, 336, 337, 341, 342, 347, 348, 355–356*
- Andam Group, Oman *33, 165, 173, 175, 189, 435–438, 436, 437*  
*see also Al Bashair Formation; Barakat Formation; Barik Formation; Ghudun Formation; Mabrouk Formation*
- Andrafiavava Formation, Madagascar *67*
- Anglo-Persian/Anglo-Iranian Oil Company *406–409, 407, 410, 411, 415*
- Angudan Orogeny *28, 29, 32, 36, 37, 41, 44, 45, 46, 47, 48, 49–50, 49, 51, 51, 52–53, 54–55, 56*
- Angudan Unconformity, Oman *32, 36, 46, 47, 165, 167, 168, 176, 177*
- Antsaba Shear Zone (ASZ), Madagascar *66, 68, 69*
- Antsirabe Nord Suite, Madagascar *66, 67, 68, 69*
- Ar Rayn Terrane, Saudi Arabia *106, 106, 113*
- Ara Group, Oman *32, 33, 33, 34–36, 34, 38, 39, 41–42, 41, 43, 44, 45, 46–47, 46, 48, 49, 50, 51, 52–53, 54, 55, 119, 131, 137, 166, 167, 175, 180, 190, 192, 434, 435, 436, 441, 455–456, 456, 457, 461, 463, 464*
- Arabian-American Oil Company (Aramco) *410, 414–415, 416, 420, 421, 422, 426*
- Arabian–Nubian Shield (ANS) *1, 2, 3, 105, 166, 167, 179, 190, 313, 314*
