Lithium in Cornwall: An introduction to Cornish Lithium's Trelavour Hard Rock and the Cross Lanes Geothermal Lithium Projects

Robert Groves
Cornish Lithium

Tuesday 29th September 2026

Online Only Talk: Starts at 6:30pm (Zoom room open from 6:15pm, see below for details)

The Western Regional Group is pleased to welcome Robert Groves of Cornish Lithium, which is an innovative mineral exploration and extraction company based in Cornwall with two developments; the Trelavour Hard Rock Project, and the Lithium in Geothermal Waters. The presentation will introduce each of these projects. Robert will also provide an overview of the uses of lithium today and where it is found geologically in Cornwall.

Robert has a background in engineering geology with experience of investigating ground stability in Gloucestershire, Wiltshire, and the southwest. For the past 2 years, Rob has been an Environmental Advisor at Cornish Lithium's Trelavour Hard Rock Project. His responsibilities have included setting up and coordinating environmental monitoring programmes for geoscience data collection needed for permitting a new mine operation.

He enjoys learning how the mining and industrial past has created the landscape we see today in the southwest, particularly along the many coastal paths.

Online Only Event; When: 29th September 2026 at 6:30 PM. **Non-members welcome.**

Zoom Details: Zoom "room" opens from 6:15pm. Zoom Link:
