What is *Online First*?

Online First is a feature offered through the Geological Society's electronic content platform, the Lyell Collection. It enables typeset articles to appear online before the final volume or issue is complete.

This feature is available for 2019 journals and Geological Society of London *Special Publications*.

All *Online First* articles on the site are in their final PDF format apart from pagination, i.e. they have been accepted for publication, copyedited, typeset, proofed and corrected.

Accepted Manuscripts

In 2018 the Geological Society began posting Accepted Manuscripts for Lyell Collection content within 2 weeks of acceptance to facilitate early access to research and citation for authors and researchers. Digital article identifiers are published for Accepted Manuscripts and registered with CrossRef allowing permanent resolution to the final Version of Record when it is published.

Access entitlements for current institutional subscribers

Lyell Collection Complete[†] subscribers can view the full text of all *Online First* articles and accepted manuscripts in the Lyell Collection.

Special Publications[‡] subscribers can view the full text of all *Special Publication Online First* articles and accepted manuscripts.

Subscribers to individual journals can view the full text of *Online First* articles and accepted manuscripts in the relevant journal.

Perpetual access is only available to *Online First* articles or accepted manuscripts published in a completed volume or issue within the subscribed-to calendar year.

Online First articles and accepted manuscripts are also available using pay-per-view. Please see www.geolsoc.org.uk/ppv for details of short-term access options.
