

# CPD Course for Teachers of A-Level Geology

## Joined-up Geology 4: Tools for teaching

**DATE  
13TH & 14TH  
JUNE 2019**

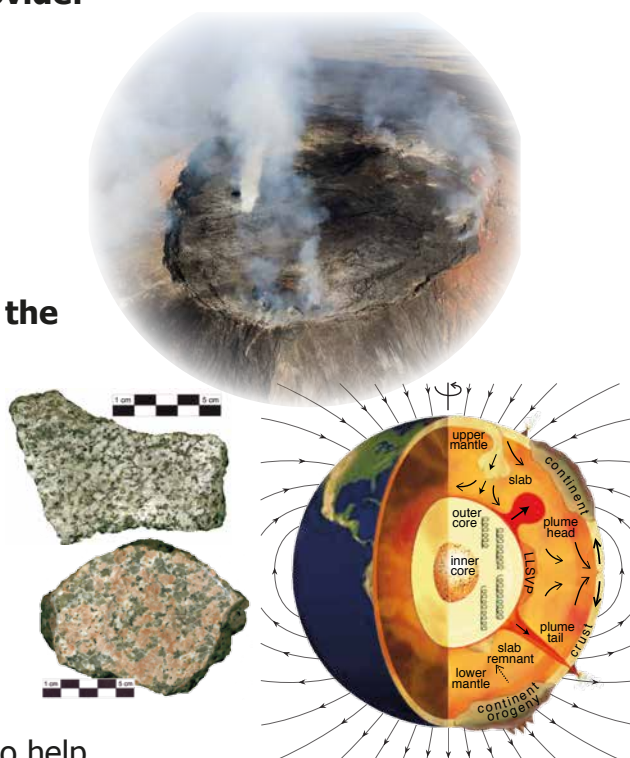

The Department of Earth, Ocean and Ecological Sciences at the University of Liverpool will be hosting this free two-day course that is specifically designed for teachers of A-Level Geology and focused on supporting teaching of the new A-Level Geology specifications.

### During this two-day event we will aim to provide:

- updating lectures
- laboratory practical sessions
- a range of teaching ideas
- teaching resources
- opportunities to discuss good practice
- ways of including mathematical skills

### Sessions planned for this course will include the following topics:

'Lithospheric plate motions'  
'Microfossils and their uses'  
'Cooling magmas'  
'Hawaiian volcanic activity'  
'Earth's magnetic field & its variations'  
'Borehole logs'  
'Walther's Law and forward modelling'

All participants will take home valuable resources to help support their future teaching. All lunches and refreshments will be provided during the course.

Please register for the course here:

For more information about the course please contact Dr. Maggie Williams at the University of Liverpool by emailing [hiatus@liverpool.ac.uk](mailto:hiatus@liverpool.ac.uk)

*"Lots of  
resources/ideas  
that can be  
incorporated into  
my teaching.  
Excellent"*

*"Many  
thanks for a  
super two days –  
may these  
courses  
continue!"*

*"An excellent  
course. The  
resources will be  
extremely useful in  
preparation for  
the new  
specification"*
