Western Regional Group

The Importance of Bath & Bristol in the Development of Engineering Geology

*Dr Adam Fisher,
John F Hunt Regeneration Ltd.*

Tuesday 20th September 2022

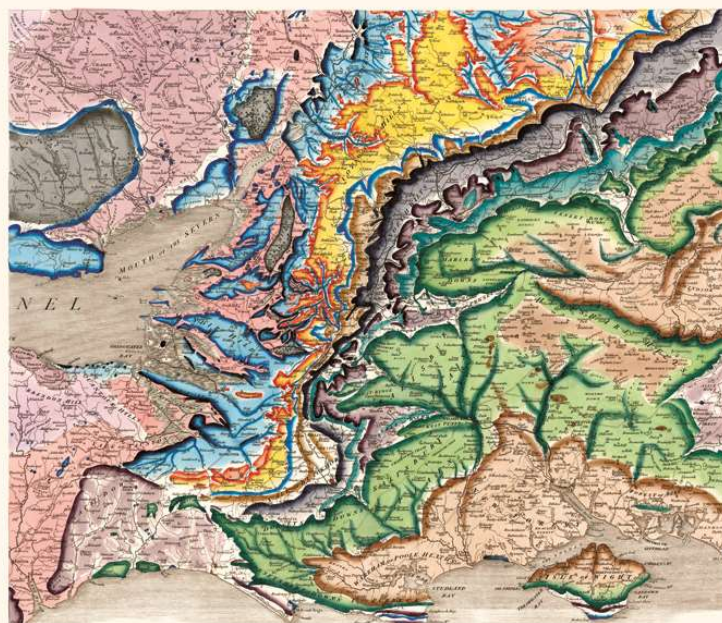

Hybrid Talk: 6:30pm Start (see below for details)

The Western Regional Group is pleased to welcome Dr Adam Fisher who will discuss his geotechnical knowledge and experience of the working in the Bath and Bristol area.

The talk will briefly overview the importance of William Smith's mapping in the Bath and Bristol area and its huge contribution to Engineering Geology. William Smith's unique geological maps, published over 200 years ago, helped to shape the economic and scientific development of Britain. The modern-day maps of Bath and Bristol will then be used to highlight some local engineering geological considerations.

Adam completed an undergraduate degree and PhD at the University of Bristol between 1991 and 1998. His career has incorporated contracting and consultancy both in the UK and Australia and his greatest area of interest is ground risk management.

Adam joined John F Hunt Regeneration in 2021 as Director of Ground Engineering and is currently delivering complex projects across the UK.
