

The Geological Society

**Call For Abstracts – Deadline 11th August 2023**

# 10th UK Geothermal Symposium

20th - 22nd November 2023

The Geological Society, Burlington House, Piccadilly, London

Corporate Supporters:

Convenors:

**David Johnstone**  
University of Manchester

**Hester Claridge**  
TownRock Energy

**Lucy Cotton**  
Geoscience Ltd

**Cathy Hollis**  
University of Manchester

**David McNamara**  
University of Liverpool

**Guy Mcpherson-Grant**  
EGS Energy

**Mark Ireland**  
Newcastle University

**Rob Raine**  
BGS

**Helen Robinson**  
IGA

**David Townsend**  
TownRock Energy

- The development of geothermal energy to provide sustainable baseload heat and power at different scales is moving at an unprecedented pace.
- Many new projects are in development and funding levels are increasing for both companies and projects.
- The 10<sup>th</sup> UK Geothermal Symposium aims to highlight the technical and scientific advances being made across the spectrum of geothermal exploration and development.

Whether you are involved in exploration and development, or policy and regulation, this conference is for you. Broad themes may include, but are not limited to, shallow geothermal and heat pumps, minewater heat, subsurface geological studies, heat and power from granites and case studies from the UK and abroad. Additional areas of research such as the development of innovative technologies and solutions, mineral extraction from geothermal waters, and the potential environmental impacts of geothermal energy are also welcomed.

It is an incredibly exciting time for the geothermal industry in the UK and this three-day conference aims to showcase all aspects of research and development in this emerging industry.
