Geology and societal change: What difference does your research make?

In 2017 the inaugural Geologists' Association Student Symposium (GASS) will take place in London. Organised by the Geologists' Association, supported by The Geological Society, the symposium aims to offer undergraduates and post-graduate students (and those that have graduated within the last 2 years) the opportunity to present their work in a friendly, informal setting. Reflecting the core values of both the GA and The Geological Society, the symposium will reflect on Geology and societal change, and will invite participants to consider what difference their research makes to society.

SUGGESTED THEMES INCLUDE:

- Geohazards
- Geological engineering
- Exploration
- Climate change

All talks and posters (except the key note address) will be presented by students; however academics, industry professionals and members of the GA and GeolSoc are strongly encouraged to attend.

The symposium will provide an excellent opportunity for the public, industry and academia to meet with the next generation of geoscientists, inspire each other and develop new friendships and collaborations. There will be ample opportunity for graduates to connect with "real life" geologists and gain valuable careers advice.

Convenors:
(on behalf of the GA)

Rebecca Bell* (Imperial College)
Liam Gallagher* (NSC Ltd.)
Simon Gozzard (Shell)
Roger Lloyd* (Open University GS)
Lucía Pérez Díaz (Royal Holloway)
Nick Pierpoint* (sabbatical)
*GA Council Member

Prizes will be awarded for the best oral and poster presentations.

Confirmed keynote speaker : **Professor Iain Stewart** (Director of the Sustainable Earth Institute, Plymouth University)
