Energy Transition Discussion Meeting April 2022

What does Geoscience need to do now for a sustainable transition to net zero?

The Energy Transition Discussion Meeting aims to identify what Geoscience needs to do now to meet the net zero targets in a fair and sustainable way - to support policy, business and innovation, and in parallel develop new scientific and engineering knowledge and solutions.

It will connect and engage the Geoscience community with key stakeholders in society, government and beyond, and through multi-way discussion, the event will both tease out and integrate geoscience, policy, sustainable development and the Energy Transition. In doing so, it will identify new opportunities for Geoscience research, development and impact, and critically ask what the Geosciences need to do now for a sustainable transition.

Duration: 26 – 27 April 2022, two full consecutive days

Reach: In person capacity of **172** plus **unlimited online**

Sponsorship

Platinum

£4,000 + VAT Early Bird (after 31st December 2021 £4,500 + VAT) Maximum 2
