GSL North West Regional Group TOWN GEOWALK

Sunday 17th May 2020

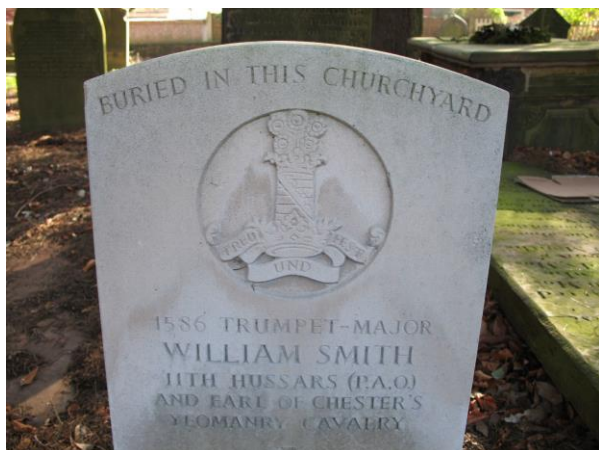

Knutsford Building Stones and Cobbles: A Geowalk with Fred Owen

As part of Geowalk 2020, which seeks to provide events to interest the general public in the natural geological environment, take this short, guided walk around Knutsford's streets to discover how ancient deserts, mountain ranges, huge rivers, tropical seas, fossils, volcanoes and glaciers formed some of the building stones and cobbles in the town.

The walk is entirely on public paths and access areas, though some footpaths are very narrow and have steps.

Numbers are limited so advance booking is essential!

FRED OWEN is a retired process chemical engineer, who has since studied geology at the Open University and Manchester SEAES. His particular interests are in the processes which compose the rocks and form the landscape as we see it today. Fred is an Honorary Member of the Manchester Geological Association, a member of the Geologist's Association and a Fellow of the Geological Society of London. He has published two geology trails.

TO BOOK A PLACE ON THE TRIP

Email

Geologicalsociety.northwest@gmail.com with your contact **TELEPHONE NUMBER.**

There is no charge for this trip.

TIME: Meet in the CAR PARK in front of THE COURTHOUSE on Toft Road (A50) WA16 0PB at 2.00pm for a 2.15pm start. Finish Time is anticipated to be 4.15pm.

There is parking available in the Pay and Display Car Parks on Moorside or Tatton Street

Organised by the North West group of the Geological Society of London

For further information contact the group secretary, Catherine Kenny at: Geologicalsociety.northwest@gmail.com

Members of the GSL: Please note this walk is a Geowalk event primarily aimed at the general public! There will be a walk for GSL members later in the year!
