

The role of geology in serious crime investigations (mud, murder and microscopes)

Dr Duncan Pirrie (University of South Wales)

Tuesday 3rd October 2017 5:30 for 6.00pm

Lecture Theatre 1.40, School of Earth & Ocean Sciences, Main Building, Cardiff University, CF10 3AT

In this talk Duncan will explain, largely through a series of case studies, how detailed analysis of geological materials can assist in the investigation of serious crime. Over the last 15 years he has provided geological advice in over 100 major investigations, mostly murder enquiries, in the UK and overseas. Duncan is a registered expert witness with the UK Police National Crime Agency, member of the International Union of Geological Sciences Initiative on Forensic Geology, Secretary of the Geological Society, Forensic Geoscience Group and currently a member of a Home Office working group.

Free entry and refreshments will be available from 5:30pm.
