

# THE MICROPALAEONTOLOGICAL SOCIETY AGM BIOSTRATIGRAPHY: A 21<sup>ST</sup> CENTURY SCIENCE

13–14 NOVEMBER, 2019 | BRITISH GEOLOGICAL SURVEY. KEYWORTH, UK

On day one, join us for a showcase of the applications of data science, machine learning and automation to biostratigraphy. Data science is changing our everyday lives and will drive increased efficiency and insight in many aspects of geoscience, including biostratigraphy.

Topics for discussion will include machine assisted interpretation of microfossil data in terms of biozone/age and palaeoenvironments; data extraction and synthesis; automation of microfossil identification.

Day two will include open sessions of short (c. 15 minute) talks and dedicated poster sessions. These sessions are open to any topic related to micropalaeontology.

CONVENERS: **Jim Riding** - BGS | **Mike Simmons** - Halliburton
