**Published today**

### **A lower Carboniferous (Visean) tetrapod trackway represents the earliest record of an edopoid amphibian from the UK**

By Hannah C. Bird, Angela C. Milner, Anthony P. Shillito and Richard J. Butler

The ichnological fossil record has previously provided key evidence for the diversification of land vertebrates (tetrapods) during the Carboniferous Period, following the invasion of the land. Within the UK, tetrapod ichnofossils from the late Carboniferous of the...[read more](#)

### **Take part in a short survey**

The Geological Society Publishing House would like to invite you to participate in a short survey to help us better understand your views and shape the publishing experience for our authors.

The survey should take no more than 12 minutes and your opinions will help us to meet the changing needs of the research community. As a thank you we are offering five Special Publications as prizes to respondents chosen at random in a prize draw.

We value your opinion whether or not you are a current member of the Geological Society. You do not need to have published with the Geological Society and your views will help the Society to shape its future publishing.

If you wish to be entered in to the prize draw for a Special Publication of your choice simply provide your contact details at the end of the survey.

### Deadline Approaching

## Call for papers for *Quarterly Journal of Engineering Geology and Hydrogeology*

The deadline is approaching if you would like to submit your paper to the 'Ground models in engineering geology and hydrogeology' in the *Quarterly Journal of Engineering Geology and Hydrogeology* (QJEGH). Please submit by 31 January 2020.

More info can be found [here](#)

### Top Tips from the Production Team

#### Data and software references - everything you need to know

When you write a paper for one of our books or journals, we encourage you to refer to underlying or relevant datasets or software, citing them in the text and including them as a full reference in the References section of your paper. You should always consider data and software to be citable products of your research. As a signatory to COPDESS' [statement of commitment](#) and a society devoted to advancing the geosciences, the Geological Society of London also encourages you to make your own data available and archived in an appropriate publicly accessible repository. We can link to these data in the paper and can archive them for you in our Figshare portal as 'Supplementary material' if you haven't already deposited your data in a community-approved repository. Check out our data policy [here](#) for further information on suitable repositories...[continue reading](#)

### AGU 2019

Attending AGU? Come and meet us!

The Geological Society of London has **booth #713** in the exhibition hall. Please pop by to browse our publications and talk to Bethan Phillips and Maggie Simmons - we are keen to receive any feedback, suggestions or ideas.

Heartiest congratulations to the authors of the most read papers in November 2019 in the Lyell Collection
