

## Digital Geoscience Champion

### Anticipated deliverables and actions

- Work with scientific theme leaders and conference convenors to embed a consideration of advanced computing and big data approaches into events and outputs.
- Identify topics that would benefit from a digital or numerical approach and propose roundtables and other events that will bring key individuals to plan such approaches.
- Engage with stakeholders across academia and all sectors of industry and the non-profit sector to create a forum where ideas can be exchanged and driven forward.
- Serve as a point of contact and encouragement for our relevant specialist groups to guide them in developing a complementary programme of activities.
- Foster a welcoming, diverse and inclusive community around this theme that serves existing Fellows while bringing in groups that don't traditionally engage with the Geological Society.
- Attend Science Committee meetings and engage the Committee's members to embed the theme within the full scope of Society science activities.

### Support from the Society

- Direct reporting lines to the Secretary for Science and the Director of Science and Communications
- Support and guidance from members of the External Relations, Science, Professional, and Education Committees.
